

# nexCarrier™

## by nexMatrix™

Your company can expect upwards of a 70% savings (can you imagine reducing your telephony costs from \$3200/mo to only \$960/mo), nexCarrier provides unlimited local and long distance calling covering the United States (excluding Alaska). Your company can have options such as extra DIDs, E911 service, local number portability along with porting your toll free number. Your nexCarrier plan exceeds the features of your legacy POTS (Plain Old Telephone Service) and provides you with additional services.

There is no equipment charge for any plans, either residential or small business to enterprise. We provide the necessary Internet access device when required by the plan as part of the service. You can generally use your existing phones or legacy telephony equipment or you can pick SIP telephone that you can bring with you anywhere there is a high-speed Internet connection you have access to. We will port your existing number(s) or provide you with a new number depending upon your situation.

We strictly adhere to standards, such as SIP, so customers, partners and stakeholders can be sure their investments in phones, equipment, and application development are never wasted.

nexMatrix local new number coverage is nearly complete for the US and Canada, but not 100%. We will notify you if there are limitations to providing local number service and options for your desired area before activating your service.

### Standard Features

- Unlimited local and long distance calling in the United States (Excluding Alaska), Puerto Rico, US Virgin Islands and Canada
- One BTN included, order DIDs individually in any amount
